

# The Clinton C of E Design Technology Update 11.11.24

The Clinton Church of England School

## Swallows

In Swallows, we have been learning all about how Stone Age people built their houses and understand the difference between Paleolithic, Neolithic and Mesolithic structures.

We carefully designed our own Stone Age houses. We created a prototype, reflected on the success of this, adapted our designs and created our final product.

Our real life purpose was to use our Stone Age houses as bug houses.

## DT at The Clinton...

In DT across the two schools we have been looking at structures in Key Stage 2 and food technology in Reception and Key Stage 1. The children have really enjoyed trying new foods and using new tools! See if you can spot the new bug houses hidden around the school grounds...

## Kingfishers

In Kingfishers the children described fruits and vegetables and explain how to identify them, named a range of places that fruits and vegetables grow and described basic characteristics of fruit and vegetables.

The children then worked hard peeling and chopping vegetables to make soup for our Harvest Soup Share.

## Little Otters

Our children in Little Otters have been looking closely at Rangoli patterns and designed some beautiful creations based on these.
